February 2007

## Letter from the Chairman

Dear Colleagues,

I take the opportunity of this Newsletter to give you some information about the Permanent Committee of the International Conferences on Ephemeroptera. Since the last conference in Montana in 2004, a couple of changes happened in the Committee's composition.

John Flannagan expressed the desire to resign from his position of treasurer, a charge he occupied since the beginning of our group. To replace him, we were lucky enough that Donna Giberson accepted the position. To John, our sincere thanks for the whole work he has done during more than 30 years and to Donna our appreciation for keeping the business under the Canadian rules and authority.

Secondly, a new member has joined the committee, namely Michael Hubbard all of you know, I am sure! Mike is in charge of the website *Ephemeroptera Galactica* [<http://www.famu.org/mayfly/index.asp>] and he will devote time and space to bring up-to-date information concerning the Committee and next conferences. In that sense, it will be an ideal complementary information source to the *Mayfly Newsletter* Pete Grant rules so perfectly.

Finally, I replaced Tomas Soldán as chairman of the committee. An up-to-date list of the Committee with contact information is available on page 4 of this Newsletter.

All of you know that the next conference will be held in Stuttgart (Germany) from June 8 to 14, 2008. The convenor is our friend Arnold Staniczek and he already has a web site where important information, call for papers, registration, accommodation etc. will be posted. The address is <http://www.jointmeeting08.naturkundemuseum-bw.de/>. [See announcement on p. 2.] Do not forget to check regularly and above all, do not miss the chance to attend this meeting. This

<sup>13</sup> Conference on Ephemeroptera will be held jointly with the 16<sup>th</sup> Symposium on Plecoptera.

One of the tasks of our Committee is also to plan the next Conferences. We invite all of you to make their proposals for the 13<sup>th</sup> Conference that should be held normally in 2011. Looking back to the previous ones, two continents have not hosted our meetings: Africa and Asia and it would be wonderful to have some applications from there. Do not forget that your proposal must reach the Committee well before the next meeting in 2008 in order to be discussed and approved by the whole assembly in Stuttgart. [Read guidelines for proposals on p. 3.]

Now, the Committee needs your help! We were looking for some kind of common action we could undertake before the Stuttgart meeting. We propose to create a database on mayfly workers, a who's who in mayfly research. For that purpose, we need your contribution about your colleagues, recent or passed. Your input (text and pictures) can be sent to Mike Hubbard who will configure it and then post it on an *Ephemeroptera Galactica* website special page. The objective is to get as many contributions as possible before the next meeting. If we succeed to bring together a significant proportion of mayfly workers, we can even investigate the opportunity to make a printed version. Check soon for *Ephemeroptera Galactica* since the first contributions will be posted early this year. If you have any query, do not hesitate to contact Mike Hubbard or myself.

I wish to all of you a happy, healthful and fruitful New Year!

Michel Sartori, Chairman

### Frequency of Publication

Originally, my goal was to publish two issues of *The Mayfly Newsletter* each year. That worked out well for a time. However, as you have noticed, the frequency of publication is now about once a year. The main reason for this is simply efficiency - It's easier and less expensive to publish one large issue each year than to publish two smaller issues.

As always, I welcome the submission of articles from you to include in the *Newsletter*. Please contact me (contact information on p. 4) if you have some ideas.

*The Mayfly Newsletter* is printed on recycled paper with vegetable-based ink.

# Bibliography of the Neuropterida, Version 7.06

A new version, 7.06, of the *Bibliography of the Neuropterida* ([http://entwww.tamu.edu/research/neuropterida/neur\\_bibliography/bibhome.html](http://entwww.tamu.edu/research/neuropterida/neur_bibliography/bibhome.html)) was posted to the web on 7 September 2006. The new version incorporates 155 new and 2344 updated reference citations, and 1000 newly linked digital files. The new files linked to this version nearly double the number of files directly accessible through the Bibliography (now 2020 total files), and represent an additional 9500 pages of neuropterid literature available through the site. More than 21,600 pages of neuropterid literature are now available through the Bibliography.

Publications linked to the Bibliography can be viewed online, and almost all can be freely downloaded as PDFs for further use. A particular emphasis has been placed on making available copies of papers that contain the original descriptions of new species and higher taxa.

The files now available from the Bibliography site contain the original descriptions of 45.1% of all available neuropterid species-group names, and 43.1% of available neuropterid genus-group names.

Although the Bibliography of the Neuropterida site will be of special interest to entomologists studying the three insect orders Neuroptera, Megaloptera and Raphidioptera, some of the literature linked to the site may also be of interest to workers in the many other orders that were broadly classed as "neuropteroids" during the 18th, 19th, and early 20th centuries (e.g., *Ephemeroptera*, Trichoptera, Odonata, Psocoptera, Plecoptera, and Mecoptera). Of particular interest in this regard may be the 657 papers now linked to the Bibliography that were authored by the three wide-ranging "neuropterist" authors Herman Hagen, Nathan Banks and Longinos Navás.

This release of the Bibliography also makes available for the first time complete digital facsimiles of a number of

important neuropteran monographs, including:

Hagen, H. A. 1861. Synopsis of the Neuroptera of North America, with a list of the South American species. Smithsonian Miscellaneous Collections 4(1):xx + 1-347. [BotN r#455]

Rambur, [J.] P. 1842. Histoire Naturelle des Insectes, Névroptères.

Librairie encyclopédique de Roret. Fain et Thunot, Paris. [xviii]+534 pp. [BotN r#5314]

Tjeder, B. 1966. Neuroptera-Planipennia. The Lace-wings of Southern Africa. 5. Family Chrysopidae. Pp. 228-534 in South African Animal Life, B. Hanström, P. Brinck and G. Rudebec, eds. Vol. 12. Swedish Natural Science Research Council, Stockholm. [BotN r#6049]

Tjeder, B. 1967. Neuroptera-Planipennia. The Lace-wings of Southern Africa. 6. Family Nemopteridae. Pp. 290-501 in South African Animal Life, B. Hanström, P. Brinck and G. Rudebec, eds. Vol. 13. Swedish Natural Science Research Council, Stockholm. [BotN r#6050]

Walker, F. 1853. List of the specimens of neuropterous insects in the collection of the British Museum. Part II.—(Sialides—Nemopterides). British Museum, London. [iii] + 193-476. [BotN r#6194]

The next version of the Bibliography will include PDFs of the "Neuroptera" (*sensu lato*) sections of many of the works of Linnaeus, Fabricius, and other early authors. This literature will also make available a fair number of ephemerop-teran original descriptions.

For more information about this bibliography, contact John D. Oswald, Department of Entomology, Texas A&M University, College Station, TX 77843-2475, phone: (979) 862-3507, email: [j-oswald@tamu.edu](mailto:j-oswald@tamu.edu).

The next International Joint Meeting will take place at the State Museum of Natural History in Stuttgart, Germany, from 8-14 June 2008. Please note that the conference website has changed:

<http://www.jointmeeting08.naturkundemuseum-bw.de/>

This preliminary site will have a major update around the end of February or early March. If you want to get notified when the site is updated, please subscribe to the conference newsletter as soon as possible. Just send an e-mail to [joint-meeting08.smns@naturkundemuseum-bw.de](mailto:joint-meeting08.smns@naturkundemuseum-bw.de) and you will receive a note as soon as the major update goes online.

Participants from developing countries will also have the opportunity to apply for limited travel grants to be able to participate in the meeting. Please check the webpage from early March on for details, or subscribe to the newsletter to keep updated!

The Joint Meeting will have an informal welcome party at the evening of June 8<sup>th</sup>. The conference will start on June 9<sup>th</sup>. There will be four days packed with talks and poster sessions the best poster will be awarded at the conference dinner on Thursday night. On Wednesday 12<sup>th</sup> there will be a field trip to creeks and rivers of the Swabian Alps, linked to a visit to a medieval monastery and University town. The post conference tour on Saturday 14<sup>th</sup> will lead to the Black Forest.

Take the opportunity and meet your colleagues at the Joint Meeting 2008!

Dr. Arnold H. Staniczek, Curator, Department of Entomology, Staatliches Museum für Naturkunde, Stuttgart, Germany.

# Alfred Edwin Eaton

## Eaton's Monograph for Sale

I've got a copy of a part of Eaton's articles in the Transactions of the Linnaean Society, volumes 2, 4, 5, and 6 (volume 1 and 3 are missing here).

38314 - Eaton (Rev. A. E.) - Transactions of the Linnaean Society of London - 2nd Ser. Zoology - Vol. III - Part 2 - July 1884 - Linnaean Society of London, Longmans, Green, Reader and Dyer, 1884. In-4, 76 pages, paperback original editor's wrappers pink, 21 plates. A Revisional Monograph of Recent Ephemeridae or Mayflies, part II, communicated by Sir John Lubbock, plates XXV to LXV - pages 77 to 152. Book condition : "moyen" (ok but not perfect): "spine is a little damaged, front-wrapper is moving and a little bit damaged, without significant missings, otherwise near fine copy." Price: 80 euros.

38315 - Eaton (Rev. A. E.) - Transactions of the Linnaean Society of London - 2nd Ser. Zoology - Vol. III - Part 4 - December 1885 - Linnaean Society of London, Longmans, Green, Reader and Dyer, 1885. In-4, 53 pages, paperback original editor's wrappers pink. A Revisional Monograph of Recent Ephemeridae or Mayflies, part IV, communicated by Sir John Lubbock - pages 229 to 281. Book condition : "Bon" (near fine) : "small missings of paper on the top and bottom of the spine, otherwise near fine copy." Price: 30 euros.

38316 - Eaton (Rev. A. E.) - Transactions of the Linnaean Society of London - 2nd Ser. Zoology - Vol. III - Part 5 - December 1887 - Linnaean Society of London, Longmans, Green, Reader and Dyer, 1887. In-4, 39 pages, paperback original editor's wrappers pink, 2 plates. A Revisional Monograph of Recent Ephemeridae or Mayflies, part V, commun-

cated by Sir John Lubbock, plates lxiv and lxv - pages 281 to 319. Near fine condition. Price: 50 euros.

38317 - Eaton (Rev. A. E.) - Linnaean Society of London Transactions of the Linnaean Society of London - 2nd Ser. Zoology - Vol. III - Part 6 - March 1888 - Linnaean Society of London, Longmans, Green, Reader and Dyer, 1888. In-4, 37 pages, paperback original editor's wrappers pink. A Revisional Monograph of Recent Ephemeridae or Mayflies, part VI, communicated by Sir John Lubbock - Index to volume 3 pages 319 to 352 - List of Papers to Volume 3, iii. Near fine condition. Price: 35 euros.

I will check it again but all the plates of those 4 volumes should be complete. I will check it again but inside should be clean, no markings, no ex-library stamps, no annotations.

Arnaud Le Bras, Philoscience, <http://www.galaxidion.com/> philoscience@wanadoo.fr.

## How to Host a Conference

The next international joint conference will be held in Stuttgart, Germany, 8-14 June 2008. If you are considering the possibility of hosting the following conference, please note the following.

Representatives from the International Conferences on Ephemeroptera and the International Society of Plecopterologists established a set of guidelines for submitting proposals to host the joint conferences. These guidelines are:

### Preliminary Proposals

Preliminary proposals to host a conference may be submitted six years prior to the year of the proposed conference, but a final vote on the conference site will not be made until three years prior to the actual conference date.

### Final Proposals

1. Proposals should be submitted at least one month prior to the conference during which the proposal will be officially presented.
2. A copy of this proposal should be sent to the chair of each committee - International Conferences for Ephemeroptera (Michel Sartori, michel.sartori@vd.ch) and the International Society of Plecopterologists (John Brittain, j.e.brittain@nhm.uio.no).
3. Proposals should be submitted by email. This facilitates distribution of the proposal to the members of the two committees.
4. Proposals should contain detailed information regarding plans to host the conference.

Contact either chair for additional information.

## Eaton's Biography

I am writing an article on the Rev. Alfred Edwin Eaton. He's known to ephemeropterologists, but for all his prominence he is not known to fly fishers even though he was the mayfly tutor to Frederic M. Halford, the grand guru of dry-fly fishing in Britain and eventually the world.

It is my intention is to bring Eaton out of the shadows and to the forefront, and thus I would be most grateful for any biographical information you may have about him.

I do have a number of his papers and some information, such as that he received his M. A. from Trinity College, Cambridge (I have a sent a query to the archivist at Isaac Newton's old school) and served at St. Peter's Church Shepton Montague from 1887 to 1892.

Thank you, and my regards,

JB Boyle  
KatyaBelousBoyle@aol.com

# Ephemeroptera of South America

Dominguez, E; Molineri, C; Pescador, ML; Hubbard, MD; Nieto, C. 2006.

Ephemeroptera of South America.

Aquatic Biodiversity of Latin America (ABLA Series), ISSN 1312-7276.

Volume 2. ISBN 9546422592, Pensoft

Publishers, Sofia-Moscow, 165x240,

218 bw and 16 color plates, keys, index, bibliography. In English, keys also in Spanish. Hdb, 642pp. EURO 115 + postage.

For many years, students from numerous countries have complained about the lack of "tools" to identify aquatic invertebrates from Latin America.

Keys found in accepted textbooks are mostly limited, superficial or too popular-science. On the other hand, more advanced keys in academic books on aquatic invertebrates fail to cover Neotropical representatives in due detail. The few that do, however, also show too many defects in scope and presentation to be considered up-to-date.

An international team of editors combined their efforts with Pensoft

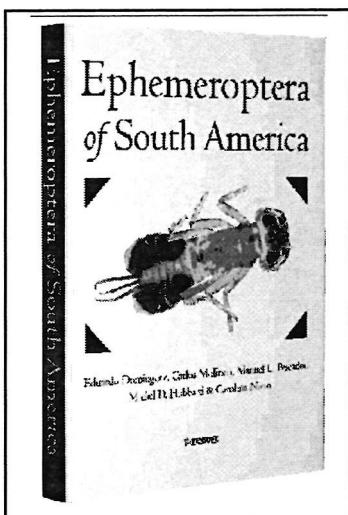

Publishers to launch a new major series on the aquatic biodiversity of Latin America. About 15 monographs, written by scientists from various countries, will offer a new, unrivalled view of the marvelous aquatic world of

South America! The series is addressed to zoologists, ecologists, hydrobiologists, biogeographers, conservationists and students interested in aquatic biodiversity. The series will be an imminent tool for any biological library.

This book covers all known families (14), genera (103), and species (470) of the insect order Ephemeroptera from continental South

America. It includes updated keys (in English and Spanish) to separate families, genera, and species (when possible), as well as complete reference data on each taxon, considering its status, characters, biology and distribution. The book is addressed to specialists in systematics, ecologists, limnologists and biologists in general.

More information is available at the publisher's website, <http://www.pensoft.net/leaflet1.pdf>.

# 2005 Mayfly Bibliography

[Editor's note: This bibliography was published as the Ephemeroptera portion of the 2005(2006) North American Bentholological Society's (NABS) *Current and Selected Bibliography on Benthic Biology*.]

The following is a list of current publications on Ephemeroptera that have been published up to and during 2005 and have not appeared in previous NABS Bibliographies.

I would appreciate receiving a reprint or complete bibliographic reference of any article about mayflies, especially if it contains scientific names, so that it may be included in next year's bibliography. Also, I would like to be informed of any corrections or omissions in this or past bibliographies. Suggestions are always welcome.

Please send all correspondence to Peter M. Grant, Department of Biological Sciences, Southwestern Oklahoma State University, 100 Campus Drive, Weatherford, Oklahoma 73096-3098 USA, phone (580) 774-3294, fax (580) 774-7140, email peter.grant@swosu.edu.

If you would like an electronic copy of this year's mayfly bibliography, simply send me a request via email. I will send this file to you as an attachment. This bibliography is also available on my website: <http://faculty.swosu.edu/peter.grant/>.
