Changes in Authentication and the World Wide Web

Ms. Karen Sweeney
Southwestern Oklahoma State University

This paper will investigate how authentication is managed and the organizations that have taken the responsibility of securing data that is published daily on the Internet. It will look at the security advances available in the computing world as well as working away from the office or home. I shall explore the many aspects the individual user faces in their daily routines when using their computing devices and the new and exciting changes for the home user in the Cloud.
