

Mobile Mammogram Unit Coming to SWOSU-Sayre

01.27.2014

The Radiologic Technology program at SWOSU-Sayre will partner with the Oklahoma Breast Care Center to offer digital mammography screenings on two Wednesdays, February 26 and March 5, on the Sayre campus.

Screenings will be available for all women in the Oklahoma Breast Care Center's mobile screening unit.

The American Cancer Society recommends that all women over the age of 40 should have an annual mammogram and clinical breast exam. Monthly self-examinations are also strongly recommended for women over the age of 18.

Women interested in a screening should call 800.422.4626, extension 110 to schedule an appointment.
