

# Mammography Screenings Available for Sayre Area Women

01.24.2013

The Oklahoma Breast Care Center will partner with SWOSU-Sayre's radiology program to offer digital mammography screening on Wednesday, February 27, and on Tuesday, March 5, at the Sayre campus.

A convenient mobile screening unit will be available for all women. It is not restricted to SWOSU students and staff but is open to the public. Any woman who is interested in this screening should call and schedule an appointment by calling (800) 422-4626, extension 110.

The American Cancer Society recommends that all women 40 and older have an annual mammogram and have an annual clinical breast exam. Officials also strongly recommend monthly breast self-exams for women 18 and older with hopes that early detection will help in the cure.
