

# SWOSU Student Group Conducting Green Project

03.04.2013

The Southwestern Oklahoma State University Health Care Student Organization is currently undertaking a “green” project on the Weatherford campus.

The Health Care Student Organization asks students and faculty to donate old electronic devices and hardware—laptops, cell phones, digital cameras, ink printer cartridges and other similar items—in the green boxes on the second floor of the Old Science Building in Room 206D. The organization will continue the fundraising effort throughout the spring semester.
