# How to Make Your Baby Shine ~ by John Lewis

*Washing your car at home saves you money, and saving money makes everybody happy. Here are a few tips and steps on how to wash your car at home. First, you need to get all of your supplies that you will need: bucket, sponge, towel, and of course the main part soap. Secondly, you fill the bucket with water put the soap in and swish it around, and then you take the water hose and spray your cherry red Mustang with water to get it wet. Then, you take the sponge with the soapy water and start washing your mustang. Then, you clean the wheels and hood, for example, you may have to take a brush and a little elbow grease to get all the dried bugs off the front that you have hit while driving. And then, when you are all finished washing it, you take the water hose again and wash off all of the soap. Lastly, you take the towel and dry off the car and buff to a nice shine. These are just a few steps to save money and have a nice clean car.*
